

Ashraellen Budget 2026

Annual budget for a multilingual artistic-philosophical research platform

This budget supports a twelve-month period of sustained artistic research, writing, editing, publication, translation, video/audio forms and platform development.

The figures remain unchanged. The explanatory frame has been clarified: equipment, software and services are presented as working infrastructure for artistic-philosophical research, required for recording, translating, publishing and preserving materials.

Hierarchy: mode of seeing → inquiry into meaning → forms of recording → public platform → production infrastructure. The infrastructure serves the research, not the other way around.

Summary

Category	Purpose / note	Annual amount (EUR)
Living support	Basic living support required to secure sustained working time for artistic-philosophical research, writing, editing and platform development.	24 000
Digital tools and AI production	AI, voice, coding, translation, editing and technical tools used as infrastructure for recording and sharing the research across languages and formats.	17 004
Video template/render infrastructure	Reusable Remotion templates, local rendering setup, testing and small render/cloud reserve for regular public forms of the research.	600
Equipment / workstation setup	Powerful laptop/workstation, wide monitor, external SSD/backup drive, hub/peripherals for editing, publication and multilingual archive work.	6 000
Internet, backup and technical reserve	Stable connection, mobile/travel internet reserve, backups, storage overflow and technical continuity for preserving the archive and working materials.	2 000
Website, domains, admin and publication support	Website maintenance, domains, publication support, minor paid services, administrative and platform-related expenses.	3 000
Accounting, tax and administrative reserve	Reserve for tax/accounting/admin obligations depending on the final legal form of grant payment and partnership structure.	12 396
TOTAL		65 000

All amounts are annual and denominated in EUR.

Production assumptions

Assumption	Value	Comment
Long-form videos per month	14	Regular long-form output across projects
Average long-form duration	15 min	Average duration used for voice-production calculation
Languages for long-form localization	9	Main multilingual platform group
Long-form voice minutes per month	1,890	$14 \times 15 \times 9 = 1,890$ minutes/month
Saint Whine Shorts per month	30	One Short per day for Saint Whine as a baseline
Average Short duration	1 min	Conservative working assumption
Shorts voice minutes per month	30	$30 \times 1 \times 1 = 30$ minutes/month
Regeneration/testing reserve	20%	Rereads, corrections, timing changes, failures, draft versions
Estimated voice minutes incl. reserve	2,304	$(1,890 + 30) \times 1.2 = 2,304$ minutes/month
ElevenLabs Business approximate monthly capacity	6,000	Capacity reference for full production mode
Estimated monthly capacity buffer	3,696	Approximate unused capacity for tests, extra Shorts and growth
